

STRATEGIC PERSPECTIVE PLAN OF THE INSTITUTION

The organization is working toward the accomplishment of its vision, purpose, and core values through a long-term strategic perspective plan that calls for ongoing progress. Stakeholders and different academic and administrative authorities provide input on the strategic plan, which is then implemented and reviewed periodically.

The field of technical education will face previously unheard-of opportunities and problems in the new millennium. Through the creation of trained labor, increased industrial productivity, and improved quality of life, technical education is essential to the nation's human resource development. A vast range of programs and specializations are covered by technical education. It is crucial that faculty members have a research and innovation mindset in order to keep themselves up to date on cutting edge technology. This organization is excited to provide faculty training to support their innovative and research endeavors.

A. Improvement in quality Technical Education:

The institute wants to work with universities and other international educational institutions to enhance its Teaching-Learning Process and Research, with the goal of improving the quality of Technical Education. The following areas are where the Institute hopes to strengthen its partnerships with reputable universities and educational institutions: Students exchange, Faculty exchange and Collaborative Research.

1. The institution uses an experimental and demonstrative teaching and learning process to provide skill-based education.
2. To provide teachers with pedagogy and pertinent technical knowledge training so they can further hone their teaching abilities and stay up to date on the most recent advancements.
3. To get academic autonomy, this will allow the institute to create a curriculum that meets industrial demands.
4. To take part in national surveys and rankings in order to get better rankings and gain national exposure and recognition.

Weakness

- Being an affiliated institution, it limits academic flexibility.
- Limited financing is available for sponsored research and development.
- There aren't many postgraduate programs, and the number of PG students admitted is rather low.
- Challenges to draw big MNCs for campus postings of Packages more than 10 LPA.
- While overcoming linguistic hurdles, students from rural areas are working hard to meet national and international standards in technical education.

Opportunities

- Startups and tech-driven businesses can emerge from the establishment of an ecosystem that fosters student creativity and entrepreneurship.
- Seeking autonomy as an institution under the auspices of JNTU Hyderabad and UGC New Delhi.
- To engage in cooperative and connecting efforts with the public and private sectors
- To increase the Innovation Cell's and EDC's activities
- The college's location will maximize the chance to serve a greater number of students with rural backgrounds.
- Fostering an entrepreneurial culture among students by putting awareness-raising, capacity-building, and sensitization programs into practice.

Challenges

- Attract and hold onto highly skilled teachers.
- Excessively long wait times for government student fee receipts for scholarship recipients there by limiting the institution's expansion.
- Creating an environment that supports creativity, research, and start-ups.
- Keeping the admissions rate at predetermined levels despite rising competition
- Drawing students from other states and high rankers in order to foster a culture of competition.
- Teaching rural kids in accordance with business requirements.
- Enhancing the caliber of student work
- The rapid advancement of technology may require more personnel and equipment
